SCIENCE OF THE MIND

PSYCHOLOGY PROVIDES INSIGHT

into human development, personality, behavior and attitude. These insights lead to advantageous wisdom you will utilize throughout your life, in personal relationships and in the workplace.

Through theory, case study, observation, experimentation and therapeutic intervention, you will expand your understanding of life's most fascinating subject – the human psyche.

You will explore illuminating subjects ranging from neurotransmitters to nurturance, and from prenatal brain development to cutting-edge research on Alzheimer's disease.

IN THIS PROGRAM, YOU WILL:

- Explore how individuals learn and develop;
- Learn what drives personalities, intellects and emotions from infancy to maturity;
- Understand how research is conducted and interpreted; and
- Gain skills to help others grow, evolve and heal.

THE MARYLHURST EXPERIENCE

At Marylhurst, you will find flexibility and convenience in a dynamic learning environment.

- Evening, weekend, daytime and online courses
- College credit for your prior learning, work and life experience
- Easy transfer of applicable credits
- Small, seminar-style classes

CAREER PATHS

Graduates will be prepared to pursue careers in clinical, research or applied settings, such as human resources, education, community outreach, substance abuse rehabilitation, case management and social work.

You also will be well equipped for graduate-level study in psychology, social work and related disciplines.

Regardless of the path you choose, a liberal arts education from Marylhurst University will enable you to effectively and ethically participate in your community.

THE PROGRAM

Social Science Core

Your studies begin with the Human Sciences Seminar, which serves as a common ground for all students pursuing degrees in the Department of Human Sciences. Psychology, human studies and social science majors engage in a rich, comprehensive discussion of the history of the central theories, methods and practices in the human sciences.

Through the social science core courses, you will acquire and practice academic research and writing skills.

Psychology Core

Courses such as Personality Theory and Abnormal Psychology will provide you with a comprehensive foundation in the theories, methods and practices specific to psychology.

Related Electives

You will customize your degree to meet your needs and objectives, through electives in psychology and other Human Science disciplines such as anthropology, political science, sociology and human studies.

Internship or Project

As you near the end of your studies, you will implement your knowledge through an internship or research project designed to advance your personal and professional goals.
